Hyaluronic Acid - Chondroitin Supplement

Product Benefits*

- Oral absorption of hyaluronic acid provides support for all joint
- Can lead to an improvement in cartilage function
- Can supplement hyaluronic acid in the synovial fluid, increasing the viscosity, reducing friction and enhancing the cushioning of the joint
- Can supplement chondroitin sulphate in cartilage to avoid the loss of elasticity and the ability to absorb water
- Hyaluronic acid and chondroitin sulphate work synergistically being more effective than when given separately

Dosage Recommendation

- Take 30 ml / 1 fl oz once daily until two 500 ml / 17 fl oz bottles are consumed
- Repeat every 4-6 months depending on your joint health and activity level

* These statements and this leaflet have not been evaluated by the Food and Drug Administration. The product is not intended to diagnose, treat, cure or prevent any disease.

Supplement Facts

Serving Size 30 ml / 1 fl oz
Servings Per Package 33

Amount Per Serving		
Calories	60	
		% Daily Value †
Total Carbohydrate	15 g	1 %
Dietary Fiber	0 g	0 %
Sugars	15 g	
Sodium	5 mg	0 %
Vitamin E (As dl-alpha Tocopherol Acetate)	17 IU	56 %
Hyaluronic Acid/ Chondroitin Complex	450 mg	**

Not a significant source of calories from fat, saturated fat, trans fat, cholesterol, protein, vitamin A, vitamin C, calcium, and iron

† % Daily Value based on a 2,000 calorie diet
** Daily Value not established

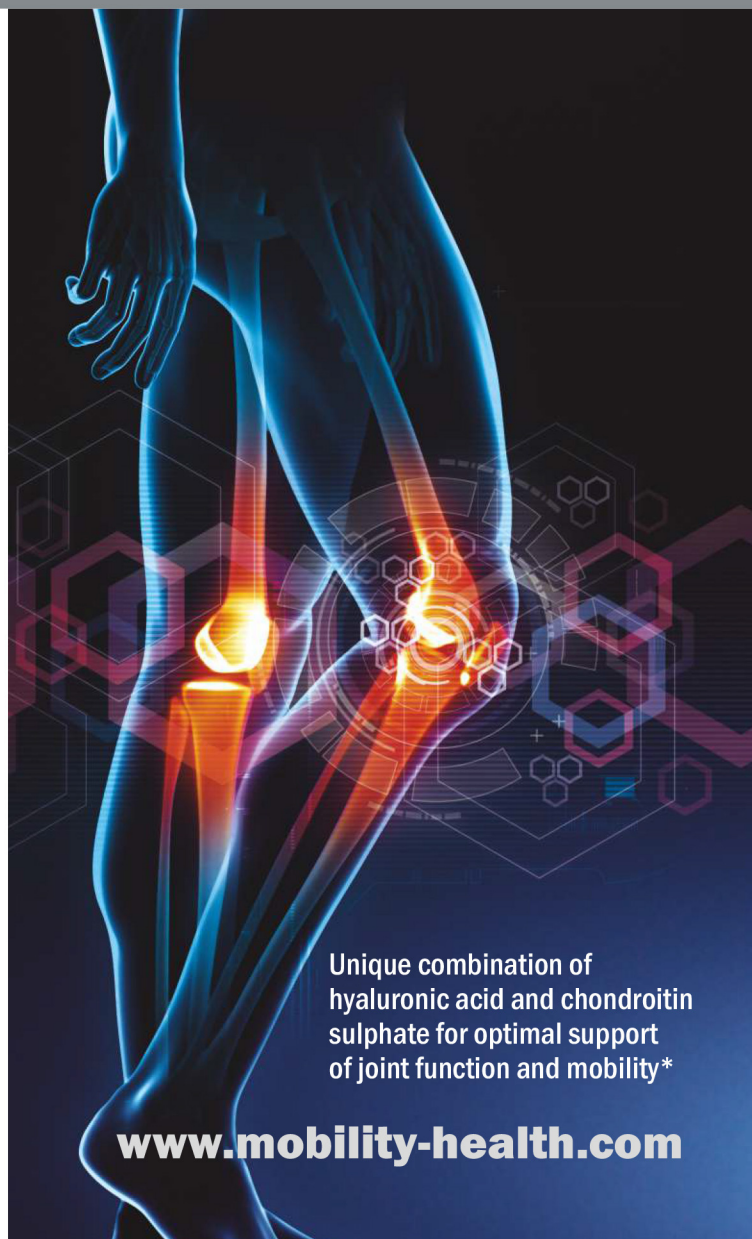

Other Ingredients: Purified Water, Potassium Sorbate

Keep out of reach of children. Store at room temperature and avoid excessive heat. Once open, store in a cool place.

Tamper Resistant: Do not use if cap seal is broken.

Caution: If you are pregnant, nursing, taking any medications or have any medical condition, consult your doctor before use. Discontinue use and consult your doctor if any adverse reactions occur.
Not intended for use by persons under the age of 18.

Unique combination of hyaluronic acid and chondroitin sulphate for optimal support of joint function and mobility*

www.mobility-health.com

Hyaluronic Acid

The engine oil for your joints

with the additive

Chondroitin Sulphate

The building blocks for your cartilage

? Did You Know

- The viscosity and lubrication capacity of your joint fluid declines with wear and tear.
- Healthy synovial fluid is essential for joint health and mobility
- Hyaluronic acid is the major component of synovial fluid
- Maintaining the viscosity of the synovial fluid provided by hyaluronic acid protects the joints
- Hyaluronic acid is necessary to provide nutrition to the cartilage
- Hyaluronic acid produced by the body declines with age

Age	% of decline
40	50
60	90

- Chondroitin sulphate is the major cellular component of cartilage tissue

Function of Hyaluronic Acid

Hyaluronic acid provides essential biochemical properties including:

- Joint lubrication
- Joint shock absorption
- Provides a scaffold for the components in the cartilage tissue

Also has unique biochemical properties involved in the regulation of:

- Pain
- Inflammation
- Tissue equilibrium

Function of Chondroitin Sulphate

- Chondroitin sulphate facilitates the regeneration of cartilage tissue
- Has a high fluid binding capacity helping maintain elasticity and shock absorbing properties of the cartilage

Clinical Support*

In a controlled clinical study in 50 patients who underwent arthroscopic surgery, 90 days post-surgery:

Symptom	Treatment % Patients	No Treatment % Patients
Reduced Pain	96	52
Improved Mobility	92	52
Less Discomfort with Daily Activity	100	64

In a controlled clinical study in 60 elderly patients with diabetes and osteoarthritis, 60 days post-treatment:

Symptom	Treatment % Patients	No Treatment % Patients
Reduced Knee Pain	55.7	14.1
Reduced Knee Stiffness	73.9	16

” I am a world champion Jiu Jitsu fighter. My body and joints are constantly under great stress. I was experiencing significant pain in my knees, hips, and shoulders. After taking Medarthro Joint Health and Mobility for 15 days, the pain had been resolved and my joint movement restored. These results have been maintained for 4 months.
